ZIAD ESSA

Full-Stack .NET & React Developer

El-Gharbia, Egypt | +20 1147204535 | zeyadissa12@gmail.com | linkedin.com/in/ziad-essa | github.com/ziad-essa

PROFESSIONAL SUMMARY

Performance-driven Full-Stack Software Engineer and Computer Science student specializing in building enterprise-grade Web Applications using .NET Core and React.js. Proficient in C#, ASP.NET Core Web APIs, Entity Framework Core, SQL Server, and modern frontend frameworks like React, Redux, and Tailwind CSS. Solid grounding in Object-Oriented Programming (OOP), Software Architecture, RESTful API design, and Database Optimization. Experienced in building scalable systems, applying Agile/Scrum methodologies, and writing clean, maintainable, ATS-friendly software code.

CORE TECHNICAL SKILLS

Backend Engineering: C#, ASP.NET Core, Web APIs, Entity Framework Core, LINQ, SQL Server, Architecture Patterns (Repository/Unit of Work, CQRS), JWT Authentication, RESTful Services.

Frontend Engineering: React.js, JavaScript (ES6+), TypeScript, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Axios, Responsive Web Design.

Database & Tools: Microsoft SQL Server, MySQL, Postman, Git, GitHub, Docker, Swagger/OpenAPI, VS Code, Visual Studio, Linux CLI.

Software Methodologies: Object-Oriented Design (OOD), Data Structures & Algorithms, Software Development Life Cycle (SDLC), Agile/Scrum, CI/CD Pipeline Basics.

PROFESSIONAL & PRACTICAL EXPERIENCE

Software Development Intern | Tech Solutions Lab **Jun 2024 – Aug 2024**

Full-Stack Development (.NET Core & React) *Remote / Egypt*

- Engineered responsive cross-platform web components using React.js and RESTful ASP.NET Core Web APIs within an Agile team of 6 engineers.
- Optimized complex SQL Server queries and Entity Framework Core LINQ calls, reducing database API response times by 35% across 2,500+ daily active users.
- Implemented secure authentication using JWT and role-based authorization for administrative dashboard routes.
- Participated in daily Scrum stand-ups, peer code reviews, and Git feature-branching strategies to ensure high code quality.

Junior Full-Stack Developer (Academic Projects) | Mansoura University **Oct 2023 – Present**

- Architected relational database schemas in SQL Server, enforcing data integrity and indexing strategies for high-throughput applications.
- Refactored legacy backend modules to adhere to SOLID principles and Clean Architecture, improving overall system maintainability by 30%.

FEATURED FULL-STACK PROJECTS (.NET & REACT)

Enterprise E-Commerce Platform | ASP.NET Core Web API, React, SQL Server **Jan 2024 – May 2024**

- Developed a scalable full-stack e-commerce engine with ASP.NET Core, EF Core, SQL Server backend, and React.js frontend with Redux Toolkit for state management.
- Designed and documented RESTful APIs with Swagger, integrating JWT authentication, Stripe payment gateway, and dynamic order processing.
- Optimized server processing time by 25% by utilizing repository patterns and asynchronous API controllers handling over 50 concurrent requests cleanly.

Real-Time Task Management System | React, .NET Core, SignalR, Tailwind CSS **Oct 2023 – Dec 2023**

- Built a dynamic multi-user task management application featuring real-time updates via SignalR and a sleek React/Tailwind frontend UI.
- Engineered custom algorithm filters using Hash Maps and Queues for automated task scheduling, achieving O(1) time complexity for primary queues.
